

INFORMATION MANAGEMENT & SECURITY POLICY

AMS No-Dig Ltd is committed to protect the security of information.

This policy is applicable to all AMS No-Dig Ltd business units, employees and any other representatives.

AMS No-Dig Ltd Key information principles are:

- AMS No-Dig Ltd wants to protect and manage information properly to ensure confidentiality, integrity and availability of information.
- Deliver a clear compliance framework in line with ISO 9001:2015 & ISO 19650:2018 which is designed to maintain and support safe, efficient and compliant business operations. This allows information to remain accurate, secure, accessible and appropriately governed throughout its lifecycle.
- Standardised processes, controlled documentation and collaborative working practices provide a single source of truth, supporting informed decision-making and reducing business risk. The organisation is committed to meeting all applicable legal, regulatory and contractual requirements while promoting continual improvement, digital innovation and effective information governance.
- Information security measures are integrated into operational processes as much as possible, minimising the overhead of dedicated security processes.
- Minimise vulnerabilities and increase system security within AMS No-Dig Ltd and towards third parties and its clients.
- Endorse third party due diligence and monitoring the compliance of information security responsibilities.

This policy is achieved by effective operation of the integrated management systems together with the active leadership, participation, professionalism and commitment of all internal stakeholders involved. The management systems aim to meet the requirements of AMS No-Dig Ltd, its clients and other external stakeholders.
